## DESCRIPTION

For the ultimate pressing performance, we suggest the 426HAB - with features that will give you professional results every time.

All our 400 series pressing tables are equipped with the industries strongest (for fast drying time) and fastest (no waiting for the motor to rev up) 3/4 h.p. vacuum motors. The up-air feature reverses the vacuum to create blowing so you can press on a cushion of air. Perfect for those delicate areas that are prone to show marks on the fabric (pocket area on pants, fly front, jacket lining, corduroy, velvet and so on... any area that if you pressed on a hard surface, it would leave an impression or crush the nap of the fabric).

The clothes you press deserves better... with the 426HAB's professional tools (vacuum and up-air), you will notice an immediate improvement in the finish quality of your ironing.

## BEST USED FOR

Shirts, pants jackets, general touch-up work
